

# Assessment

---

# Assessment and Pass

- **Coursework only**, no exam
- 1 coursework
  - CourseWork 1 (**CW1**): Full Stack Software Applications Development (**Individual**) (40%):
    - Front-End
    - Back-End
    - System-Administration
- You need an **overall mark of at least 40% to pass the module**

# Assessment and Demonstration (DBI)

- Each coursework part requires a **submission** and a **demonstration**:
  - **1-to-1 demonstration** during lab.
  - each demonstration will be **around 15 minutes**.
  - **The demonstration is the most important part.**
  - The submission needs to be **demonstrated in the lab.**
    - **Submissions not demonstrated** will receive **zero mark**.
  - Coursework part **not explained satisfactorily during the demonstration** could also receive **zero mark**.

**IMPORTANT:** the work must be demonstrated and explained satisfactorily during demonstration, i.e. student can explain what the code does.

# Assessment: Handbook and CW Details

- All the **CW details** are in the **Handbook**
- Of course, later, **during our Workshops**, we will cover more in detail:
  - the **specifics of each coursework part** and the related **requirements**, with even **more detailed explanations** (**everything will become clearer to you**) and
  - **on My Learning** you will be able to see (in the title of the weeks) when we will check more in detail each coursework part (i.e. in the **title of the week** there will be also something related to the CW, for example something like “**CourseWork 1 (CW1) Requirements**”, and you will be able to **re-watch the related Workshop Recording**
